IMPACT Silver Corp.

Notes to Consolidated Financial Statements

June 30, 2010

Canadian Dollars

Unaudited

1. Description of business and nature of operations

IMPACT Silver Corp. and its subsidiaries (collectively, "IMPACT" or the "Company") are engaged in silver mining and related activities including exploration, development, extraction and mineral processing. The Company operates the Royal Mines of Zacualpan in the State of Mexico and produces silver, lead, zinc and gold sold in the form of lead and zinc concentrates. The Company is also active in the exploration for silver, precious metals and other mineral resources on its properties located in Mexico and the Dominican Republic.

2. Summary of significant accounting policies

These unaudited interim consolidated financial statements have been prepared by the Company in accordance with Canadian generally accepted accounting principles "GAAP" and follow the same accounting policies and methods of their application as the most recent audited annual consolidated financial statements, except as described in Note 3. The accompanying unaudited interim consolidated financial statements should be read in conjunction with the Company's audited annual consolidated financial statements as at December 31, 2009, as they do not contain all disclosures required by GAAP for annual financial statements. All dollar amounts are disclosed in Canadian currency unless otherwise noted. Certain comparative figures have been reclassified to conform to the presentation adopted for the current period.

a) Principles of consolidation

These consolidated financial statements include the accounts of the Company and all of its subsidiaries, including:

- Jade Oil Corporation ("Jade"), located in Canada;
- Minera Aguila Plateada S.A. de C.V. ("MAP"), Minera Porvenir de Zacualpan S.A. de C.V. ("MPZ") and its wholly owned subsidiary Minera Laureles, S.A. de C.V. each located in Mexico; and
- Proyectos Mineros, S.A. ("PMSA") and Minera Monte Plata, S.A. ("MMP"), both located in the Dominican Republic.

All intercompany transactions and balances have been eliminated.

3. Changes in accounting policies

Adoption of new accounting policies

In January 2009, the Canadian Institute of Chartered Accountants ("CICA") issued Section 1582 – *Business Combinations* to replace Section 1581. Prospective application of the standard is effective January 1, 2011, with early adoption permitted. This new standard effectively harmonizes the business combinations standard under Canadian GAAP with International Financial Reporting Standards ("IFRS"). The new standard revises guidance on the determination of the carrying amount of the assets acquired and liabilities assumed, goodwill and accounting for non-controlling interests at the time of the business combination.

The CICA concurrently issued Section 1601 – *Consolidated Financial Statements* and Section 1602 – *Non-Controlling Interests*, which replace Section 1600 – *Consolidated Financial Statements*. Section 1601 provides revised guidance on the preparation of consolidated financial statements and Section 1602 addresses accounting for non-controlling interests in consolidated financial statements subsequent to a business combination. These standards are effective January 1, 2011, unless they are early adopted at the same time as Section 1582 – *Business Combinations*. We have chosen to early adopt Sections 1582, 1601 and 1602 effective January 1, 2010. There is no effect on previous business combinations.

	1,122,236	1,117,845
Resource properties	\$ 21,414,793	\$ 20,805,894

b) On March 17, 2010 the Company exercised its option to purchase the 200 tonne-per-day Veta Grande processing plant in Zacatecas, Mexico. Cash paid and IMPACT common shares issued as option payments in 2006 through 2009 were originally assigned to resource properties. With the completion of this purchase IMPACT reallocated the costs originally assigned to resource properties to property, plant and equipment as follows:

Land	\$ 532,494
Plant equipment	824,002
Resource properties	\$ (1,356,496)

7. Due to related party

At June 30, 2010, an amount of \$445,701 (December 31, 2009 - \$274,560) was due to Energold Drilling Corp., a significant shareholder of the Company. Monies owed to Energold Drilling Corp. are unsecured, non-interest bearing and without specific repayment terms. Management anticipates that the amount will be repaid within one year and accordingly it has been classified as current.

d) Stock options

The Company has established a stock option plan whereby the board of directors may, from time to time, grant options to directors, officers, employees or consultants. Under the stock option plan 9,725,117 options have been authorized for issuance, of which 4,114,875 have been allocated at June 30, 2010. Options granted must be exercised no later than five years from date of grant or such lesser period as determined by the Company's board of directors. The exercise price of an option is not less than the closing price on the Exchange on the last trading day preceding the grant. Options vest 25% on the date granted and 12.5% every quarter thereafter.

A summary of the Company's stock options at June 30, 2010 and the changes for the periods ended on these dates is as follows:

	Number	Weighted Average Exercise Price (\$)
At December 31, 2008	1,891,000	1.01
Granted	2,235,000	0.55
Exercised	(289,375)	0.29
Cancelled	(83,750)	0.85
At December 31, 2009	3,752,875	0.80
Granted	1,012,500	1.10
Exercised	(543,000)	0.43
Cancelled	(72,500)	1.02
Expired	(35,000)	1.44
At June 30, 2010	4,114,875	0.91

The following table summarizes information about the stock options outstanding at June 30, 2010:

Exercise Price Per Share (\$)	Expiry Date	Options Outstanding	Options Exercisable
1.40	September 5, 2012	985,000	985,000
1.67	October 22, 2012	75,000	75,000
0.55	January 6, 2014	2,042,375	1,779,250
1.10	June 6, 2015	1,012,500	253,125
		4,114,875	3,092,375

On June 6, 2010, the Company granted stock options under its Stock Option Plan to directors, officers, employees and consultants exercisable for up to 1,012,500 shares of the Company, with an estimated value of \$418,000 on the grant date. The options are exercisable on or before June 6, 2015 at a price of \$1.10 per share.

The Black Scholes Option Pricing Model is used to estimate the fair value of stock options for calculating stock-based compensation expense. The Company recognized a stock-based compensation expense and an increase to contributed surplus based on a graded vesting schedule using the assumptions as follows:

Date Granted	June 6, 2010
Number of options granted	1,012,500
Risk-free interest rate	1.75%
Expected dividend yield	NIL
Expected stock price volatility	57%
Expected option life in years	3

Option pricing models require the input of highly subjective assumptions including the expected price volatility. Changes in the subjective input assumptions can materially affect the fair value estimate, and therefore the existing models do not necessarily provide a reliable single measure of the fair value of the Company's stock options.

10. Capital management

The Company's objectives when managing capital are to safeguard its ability to continue as a going concern, to provide an adequate return to shareholders, to meet external capital requirements on credit facilities and to support any growth plans.

The capital of the Company consists of the items included in shareholders' equity and cash and cash equivalents net of debt obligations. The Company monitors capital based on the debt to debt-plus-equity ratio. Debt is total debt shown on the balance sheet, less cash and cash equivalents. Debt-plus-equity is calculated as debt shown on the balance sheet, plus total shareholders' equity which includes accumulated other comprehensive income (loss), share capital, contributed surplus and retained earnings or deficit.

The Company's policy is to keep its debt to debt-plus-equity ratio at a manageable level consistent with the current business cycle and the business opportunities outlook foreseen by the Company. As a general guideline, the Company's policy will be to keep its debt to debt-plus-equity ratio to a minimal level, except in unusual circumstances such as a major acquisition. Currently the Company has no debt and is in full compliance with its capital risk management policies. The Company's Board of Director's approves management's annual capital expenditures plans and reviews and approves any material debt borrowing plans proposed by the Company's management.

To effectively manage the entity's capital requirements, the Company has in place a planning and budgeting process to help determine the funds required to ensure the Company has the appropriate liquidity to meet its operating and growth objectives. The Company ensures that there are sufficient cash and cash equivalents to meet its short-term business requirements, taking into account its anticipated cash flows from operations and its holdings of cash and cash equivalents.

11. Financial instruments

Financial assets and liabilities

The Company's financial instruments consist of cash and cash equivalents, accounts receivable, investments, accounts payable and accrued liabilities, and due to related parties. For cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities, and due to related parties, carrying value is considered to be fair value due to the short-term nature of these instruments. The fair value of investments is determined by quoted prices in active markets for identical assets at the balance sheet date. At June 30, 2010 all equity investments held were classified as Level 1 and cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities were classified as Level 2 on the fair value hierarchy of Handbook Section 3862 – *Financial Instruments - Disclosures*.

Financial instrument risk exposure

The Company's financial instruments are exposed to a number of financial and market risks including credit, liquidity, currency, interest rate and price risks. The Company may, or may not, establish from time to time active policies to manage these risks. The Company does not currently have in place any active hedging or derivative trading policies to manage these risks since the Company's management does not believe that the current size, scale and pattern of cash flow of its operations would warrant such hedging activities.

Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. Financial instruments that potentially subject the Company to credit risk include cash and cash equivalents, accounts receivable and investments. The Company deposits its cash and cash equivalents with high credit quality financial institutions as determined by ratings agencies, with the majority deposited with a Canadian Tier 1 Bank. The Company's maximum exposure to credit risk at the reporting date is the carrying value of its cash and cash equivalents (\$4.0 million), accounts receivable (\$2.7 million) and investments (\$0.03 million).

11. Financial instruments - *continued*

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its obligations as they fall due. The Company manages liquidity by maintaining cash and cash equivalent balances available to meet its anticipated operational needs. The Company has not been required to establish committed credit facilities but will do so as necessary. Liquidity requirements are managed based on expected cash flow to ensure that there is adequate capital to meet short-term and long-term obligations. The Company has in place a planning and budgeting process to help determine the funds required to support the Company's normal operating requirements on an ongoing basis and its growth plans. At June 30, 2010 the Company did not have any significant future debt obligations.

Interest rate risk

The Company is exposed to interest rate risk on its cash and cash equivalents. Generally, the Company's interest income will be reduced during sustained periods of lower interest rates as higher yielding cash equivalents and any short term investments mature and the proceeds are invested at lower interest rates.

Currency risk

Foreign exchange rate fluctuations may affect the costs that the Company incurs in its operations. Silver, lead, zinc and gold are sold in U.S. dollars and the Company's costs are principally in Mexican pesos and Canadian dollars. At June 30, 2010 the Company is exposed to currency risk through the cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities, and due to related party held in U.S. dollars and Mexican pesos. Based on these foreign currency exposures at June 30, 2010, a 5% depreciation or appreciation of all the above currencies against the Canadian dollar would result in an approximate \$35,000 (June 30, 2009 - \$50,000) decrease or increase in the Company's net earnings for the six months ended June 30, 2010.

Commodity price risk

The Company is subject to commodity price risk for all the principal metals that are recovered from the concentrates that it produces. These include silver, lead, zinc, and gold. These metal prices are subject to numerous factors beyond the control of the Company including central bank sales, producer hedging activities, interest rates, exchange rates, inflation and deflation, global and regional supply and demand, and political and economic conditions in major producing countries throughout the world. The Company has elected not to actively manage our exposure to metal prices at this time.
